

Great Accessories for the CornuFé 110 cm Range - All Below Items are Available through Williams Sonoma

GRIDDLE

All-Clad makes a generously sized Griddle that fits perfectly over our two 12,000 BTU burners: [All-Clad Nonstick Double Burner Griddle Pan](#)

"Cooking pancakes or grilling sandwiches for a crowd is a simple task with this commercial-size griddle, which spans two burners. The griddle is constructed of fast-heating anodized aluminum with All-Clad's durable Excalibur nonstick coating, so foods cook quickly and evenly with a minimum of added fat. A well around the perimeter channels drippings away from food; cast stainless steel handles curve up and away from the heat. Hand-wash. 20" x 13". A Williams-Sonoma exclusive." **ITEM #: 2738474**

GRILL PAN

All-Clad makes a generously sized Grill Pan which fits perfectly over the two 12,000 BTU burners: [All-Clad Double Burner Grill Pan](#)

"Spanning two burners, this commercial-size stovetop pan simplifies grilling bacon, juicy steaks and tender vegetables. Its ridged surface sears in grill marks and lets fat drip away. Constructed of anodized aluminum, the pan heats quickly and uniformly. Its nonstick finish releases foods easily and simplifies cleanup. The stainless-steel handles stay cool. Hand-wash. 20" x 13". **ITEM #: 3572369**

HALF-SHEET PANS

Williams-Sonoma makes the perfect baking sheets for the CornuFé ovens. Believe it or not, you can fit seven of these in your range at one time!

Available in Nonstick or Aluminum-coated steel: [Nonstick Goldtouch Half-Sheet Pans](#)

Nonstick: "These rimmed sheet pans boast two layers of technologically advanced Swiss-made Goldtouch™ nonstick coating, a ceramic-reinforced nonstick surface that will not chip or peel and is highly scratch resistant. To withstand frequent use, the nonstick layers are bonded to commercial-gauge aluminized steel, the same construction used by professional kitchens because it distributes heat quickly and evenly, producing consistent baking results. A thick band within each pan's lip increases durability and prevents warping or flexing. Dishwasher safe. 18" x 13" x 1" high. A Williams-Sonoma exclusive." **ITEM #: 7087034 (single) OR 7121965 (set of 2)**

COOKIE SHEETS

These cookie sheets from Williams Sonoma fit nicely on the two flat racks provided with the CornuFé range. Note that these will not work on your two CornuFé dropped racks. [Nonstick Goldtouch Cookie Sheets](#) or [Nonstick Goldtouch Insulated Cookie Sheet](#) and [Commercial-Quality Cookie Sheets](#)

Nonstick: Designed to promote even baking and browning of pressed, rolled and dropped cookies and pastries, the cookie sheet releases baked goods in perfect shape and cleans up in seconds. The pan features a reinforced design for extra strength that prevents warping, a common cause of uneven baking. Two angled sides provide a good grip when you're removing the pan from the oven; the longer sides are flat so cookies slide right off. The pan also boasts two layers of technologically advanced Swiss-made Goldtouch™ nonstick coating, a ceramic-reinforced nonstick surface that will not chip or peel and is highly scratch resistant. To withstand frequent use, the nonstick layers are bonded to commercial-gauge aluminized steel, the same construction used by professional kitchens because it distributes heat quickly and evenly, producing consistent baking results. Dishwasher safe. 16" x 14". A Williams-Sonoma exclusive. **ITEM #: 7353626 (set of 2)**

Nonstick Insulated: Insulated to ensure that cookies won't overbrown, this cookie sheet boasts a durable nonstick Goldtouch™ coating. Two layers of the ceramic-reinforced coating are bonded to the baking surface. Technologically advanced, it won't chip or peel, and is highly scratch resistant. An insulating pocket of air between the sheet's two tin-free steel layers increases heat circulation, so cookies bake evenly throughout and emerge with a light golden crust. 16" x 14". A Williams-Sonoma exclusive. **ITEM #: 7080807 (sold in single quantities only)**

Commercial Quality: Made by Chicago Metallic, these rustproof, aluminum-coated steel sheets are ideal for baking your favorite cookies. The metal resists warping, a common cause of uneven baking. Extremely durable, the aluminized steel heats quickly and evenly to ensure uniform baking. Each sheet has an angled side to provide a good grip when you're removing the pan from the oven; the longer sides are flat so cookies slide right off. 16" x 14". A Williams-Sonoma exclusive. **ITEM #: 2065407(single) OR 2153468 (set of 2)**
